Vivek Parmar

vivekparmar97@outlook.com (647) 546-4693 vivekp97 VivekP97

I am a dedicated Full-Stack Software Developer with over 5 years of experience delivering highly-performant, scalable solutions on SaaS platforms. I have led key initiatives by authoring technical specifications and driving major feature implementations with a commitment to technical excellence, promoting innovation and user satisfaction. I proactively tackle challenges and constantly seek opportunities to enhance my skills and contribute to product and organizational success.

Technical Skills

LANGUAGES • FRAMEWORKS		TOOLS		SYSTEMS • APIs	CONCEPTS
• Bash	• JavaScript	• Azure	• Grafana	• Microsoft Graph API	• Agile Methodology
• C	• JSON	• Bitbucket	• Jenkins	• MongoDB	• Memory/CPU Optimization
• C#/.NET	• Powershell	• Confluence	• JIRA	• RabbitMQ	• Microservice Architecture
• Excel VBA	• React	• Docker	• Kubernetes	• REST APIs	• Object-Oriented Programming (OOP)
• Go/Golang	• SQL	• Expo Orbit	• Postman	• Staxbill/Fusebill API	• Version Control Strategies
• Java	• Vue.js	• Git	• SonarQube		

Work Experience

Borrowell

FULL-STACK SOFTWARE DEVELOPER — **MAY 2025 - PRESENT**

- Develop cross-platform features for 2 core customer-facing products
- Perform technical investigations to evaluate feasibility and constraints, helping shape product direction and prioritization
- Contribute to developer-led initiatives to improve internal systems and streamline tedious processes

Emailgistics Corp.

SENIOR FULL-STACK DEVELOPER — **NOV 2023 - MAY 2025**

- Developed 15+ Go microservices exposing secure APIs to integrate with a Vue.js web app in a cloud environment
- Leveraged version control strategies, pull requests, and code reviews to mitigate bugs and maintain good coding standards
- Resolved bugs and performance issues across the stack with root-cause analysis and quick turnarounds
- Deployed containerized apps to collect logs and metrics across the stack and ship them to Grafana Cloud for monitoring

FULL-STACK SOFTWARE DEVELOPER — **APR 2020 - OCT 2023**

- Authored comprehensive technical documentation for 3 key features and managed the development of 5 major features, delivering fully-functional solutions within project deadlines to ensure customer satisfaction
- Crafted a multi-phase plan to seamlessly restructure millions of stored data documents and redesigned data aggregation pipelines to substantially improve runtime performance, resolving scalability concerns with zero downtime
- Co-led the upgrade of our web application from Vue 2 to Vue 3; a large-scale project involving extensive code refactoring and partitioning of monolothic components
- Deployed a RabbitMQ cluster to our microservice environment using Kubernetes and Docker which processes over 2 million messages per day, supporting 4 major features with 24/7 uptime

CIBC

TESTING AND TECHNICAL SERVICES ANALYST (Co-op) — **MAY 2017 - AUG 2017 / MAY 2018 - AUG 2018**

- Enhanced Excel VBA macros to automate user management and release processes in HP ALM
- Executed health check scripts to monitor internal systems and applications, ensuring optimal performance

Education

Bachelor of Science in Computer Science (Honours)

RYERSON UNIVERSITY

Certifications

- IBM Application Security for Developers
- AWS Certified Cloud Practitioner
